

## Purpose

Maple Valley Preschool & Childcare Center is licensed bi-annually by the State of Washington for the care of children ages 2-5 years. Our facility meets rigid health, fire and sanitation department requirements and inspections.

The purpose of Maple Valley Preschool & Childcare Center is to provide quality Christ-centered childcare as a service to the community and parents we serve. We strive to create an environment of Christian love and acceptance where your child will find security and happiness in your absence. We seek to provide guidance for your child, which would enable them to relate to adults and children their own age, and to cope within their world. We strive to build positive self-esteem in each child through successful experiences in a stress free, happy environment.

Because we are a Christian based preschool/childcare, Bible stories, songs, and scripture verses are included as a part of our teaching program. We believe that every child deserves a foundation of knowing about Christ, and without it, education is not complete.
